SUMMARY

A Computer Engineering graduate from Telkom University with a versatile skill set spanning Software Development, Internet of Things (IoT), and Embedded Systems. I possess hands-on experience in executing end-to-end technical projects, from designing hardware architectures and firmware as a Laboratory Assistant at RnEST, to building full-stack web applications using modern frameworks (React, Vue.js, Laravel, Node.js). A notable highlight is my final year project: engineering an IoT-integrated portable Potentiostat for dengue detection, seamlessly bridging sensor hardware with real-time web monitoring dashboards. Equipped with a strong foundation in Python, computer vision, and UI/UX principles, I am a highly adaptable and detail-oriented fresh graduate eager to bring my analytical problem-solving skills to a dynamic engineering team.

EDUCATION

Telkom University — Bandung, Indonesia
Bachelor of Computer Engineering | **GPA: 3.16 / 4.00** — *Sep 2022 – Aug 2026*

WORK EXPERIENCE

R&D Intern (Computer Vision & IoT) — **Bandung, Indonesia**
Procodecg Startup — *Nov 2025 - Dec 2025*

- Engineered software-hardware integration by connecting AI detection outputs with Arduino, creating a prototype lot warning system with a fast 1-2 second indicator response time.
- Built a real-time object detection pipeline utilizing Python and OpenCV on NVIDIA GTX 1050, maintaining processing speeds of 20-30 FPS.
- Trained and evaluated YOLOv8 using ±500 manually labeled vehicle images for potential truck overload detection, achieving an 85-90% mAP test performance.

UI/UX Designer Intern — **Bandung, Indonesia**
PT Teknologi Nirmala Olah Daya Informasi (Techno Infinity) — *Jun 2025 - Nov 2025*

- Designed 50+ e-commerce application screens and states in Figma, progressing from wireframes to interactive prototypes for seamless front-end developer handoff.
- Developed a comprehensive design system comprising 50+ reusable components and variants, ensuring UI consistency and accelerating the development process.
- Contributed to the UI/UX of UNPAD's SIKESPADU system across 3 main modules, including dashboard, grade input, and navigation workflows.
- Conducted usability testing with 5-10 respondents and iterated major flows based on user feedback.

Laboratory Assistant & PDD Coordinator — **Bandung, Indonesia**
RnEST Laboratory (Robotic & Embedded System Technology) — *Jan 2024 - Dec 2025*

- Mentored 30-50 students per semester across 8-12 practical sessions covering Digital Techniques and Microprocessors, strengthening core engineering concepts.
- Authored and developed 2 comprehensive practicum modules, including learning materials, technical assignments, and practical procedures.
- Led the Publication, Design, and Documentation (PDD) Division, coordinating a 3-person team for laboratory publications and operational announcements.

Marketing & Distribution Executive **Jakarta, Indonesia**

Jaffar Indo Comodity *Jan 2024 - Jul 2024*

- Formulated marketing strategies and managed distribution channels to support product market expansion in the Greater Bandung and Jakarta areas over a 7-month period.

PROJECTS

Personal Portfolio Website & Admin CMS **2026**

Full-Stack Developer | *HTML, CSS, JavaScript, PostgreSQL, Docker*

- Architected and deployed a full-stack portfolio website integrated with a custom Content Management System (CMS) for dynamic content updates.
- Implemented secure authentication, robust database management using Supabase, and structured development workflows utilizing Git, GitHub, and Docker deployment.

Portable Potentiostat & IoT Monitoring System **2025-2026**

Firmware & Full-Stack Developer | *C/C++, Laravel, Vue.js, MySQL*

- Engineered an end-to-end portable potentiostat device achieving high cyclic voltammetry (CV) repeatability, handling both hardware integration and firmware development (C/C++).
- Built a comprehensive web dashboard using Laravel and Vue.js with a MySQL database to visualize real-time data transmitted via REST APIs from the IoT device.

ORGANIZATIONS

Head of Entrepreneurship Division | 2026

Computer Engineering Student Association (HMTK), Telkom University | Bandung, Indonesia

- Directed the production and distribution of organizational merchandise, managing product planning, vendor coordination, and procurement.
- Negotiated with external vendors to align product quality, pricing, and design requirements with production schedules.

Public Relations Division | 2026

Compile Tech Fest, Telkom University | Bandung, Indonesia

- Acted as the primary liaison between the organizing committee and external stakeholders, managing formal communications and the distribution of official invitation letters.

Head of Percussion Coordinator | 2026

Gladius Ultras Core Board, Telkom University | Bandung, Indonesia

- Led and trained the percussion division members, ensuring team readiness for graduation parades and major student events.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript/TypeScript, Python, C/C++, Java, PHP, Laravel, HTML/CSS, React, Node.js

Databases & Backend: SQL (MySQL, PostgreSQL), Supabase, REST & API

AI & Embedded Systems: Claude Code, Codex, OpenCV, YOLOv8, Arduino, ESP32, STM32, MQTT, I2C, SPI, UART

Tools & Platforms: Git, GitHub, Docker, VSCode, Linux (VPS Deployment), Figma, Canva, Ms Office, Adobe Tools (Premier, Photoshop, AI, AE)

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Leadership, Effective Communication,

ACHIEVEMENTS & CERTIFICATION

Certified English Proficiency Test (EPrT) Score : 450 (A1- B1) - Telkom University

Credential ID: 23574/SPI3-F/BHS/2026

Google Analytics Certification (2026) - Google Digital Academy (Skillshop)

Credential ID: 188056386

Campaign manager 360 Certification (2026) - Google Digital Academy (Skillshop)

Credential ID: 188056032
